

Outlaw Truck and Tractor Pulling Association
www.outlawpulling.com

DATE: 12/13/16

TO: Outlaw Light Super Stock Competitors

FROM: Doug Roberts, OTTPA CEO

On Saturday, January 14, 2017 we will be having a Light Super Stock rules meeting at the heated shop of Randy & Tim Dunklau at 11:00 AM. We will break at noon or so for pizza and refreshments. There will be rearend, transmission, clutch and axle housings on site from John Deere, International, Allis Chalmers & Ford to look at and go over the do's and do not's with these cast parts. We will also be teching & measuring a tractor, so if any competitor or group wants to see that done and a measuring chart to take home and make copies for your group, feel free to come and attend. After this meeting I am going to the Outlaw board and try to get these rules locked in for 3 years as it is not fair to the competitors building or redoing these cast housing this year to just have rules change again next year. So everyone is invited from OTTPA, Xcaliber, Nebraska Tractor Pullers, Nebraska Bush Pullers or any other associations in Missouri, Iowa or Nebraska that would like to attend. That includes your tech and board members. So if any competitor is thinking about building in the future or attending an Outlaw event this will show you what will need to do to pass tech and be a legal entry at OTTPA events. We would appreciate your questions and input on these matters. The shop address is 21748 Co Rd P32, Arlington, NE 68002. Any questions call OTTPA Tech, Ryan Boysen at 712-880-0178 or class representative Randy Dunklau at 402-618-0007.

Thanks, Doug
